

In addition to the general maintenance of facilities, each academic department requires support for special projects such as technology updates and cutting-edge equipment needed to maintain and/or enhance each program. The individual departments also require support for the visiting artists program, a great professional practice tool which significantly enhances the college experience of our students by generating meaningful discussion and stimulating their studio practice. We hope that we can count on your support in underwriting the following list of projects included in this year's budget.

---

**Your tax-deductible tribute gift will help underwrite the following projects and items for this year:**
